

Education

Universitas Andalas

Padang, West Sumatra

B,Eng in Computer Engineering. GPA 3.45/4.00

August 2025

Thesis: Motorcycle Driver Drowsiness Detection Using Eye Aspect Ratio And Percentage Of Eyelid Closure

Relevant Coursework: Machine learning, Computer vision, Cloud computing, Database, Algorithm and Data Structure

Experience

Metro Indonesian Software

Padang, West Sumatra

Software Engineer

September 2024 – April 2026

- Created 10+ dynamic wedding e-invitation templates in Vue.js, integrating a RESTful API for RSVP management, guest messages, and live event updates.
- Developed a high-volume booking platform for a 9-branch gaming rental chain using React, NestJS, MySQL, and Midtrans, supporting 150+ daily transactions.
- Developed a NestJS backend with input validation, role-based access control, and Google Drive and Google Sheets API integration.
- Researched and developed Go-based backend service for future backend services.
- Designed an ACID-compliant SQLite schema and transactional handling for an ERP system, centralizing real-time inventory management across 5+ branches.
- Established the project tech stack, codebase structure, and development workflow for the developer team.
- Managed application deployment on Google Cloud Platform to ensure reliable production availability.
- Architected deployment infrastructure using Cloudflare Worker and Storage services to reduce infrastructure and bandwidth costs.
- Developed responsive web interfaces using React and Vue, ensuring usability, accessibility, and consistency across devices.
- Introduced SEO enhancements for landing pages to improve search visibility and on-page structure.
- Built a content management system to help non-technical users create, edit, and publish content easily.

Studio20 Malaysia

Remote

Fullstack Developer

September 2025 - November 2025

- Designed and implemented an ACID-compliant PostgreSQL database schema to support transactional operation.
- Analyzed database queries across API services to improve data retrieval efficiency.
- Implemented role-based authentication to control and secure access to protected resources.
- Integrated NestJS backend with a Firebase notification system to send notification for mobile devices.
- Connected LLM models to the backend service for reviews sentiment analysis and content summarization.
- Supported design and planning by prioritizing features for upcoming development cycles

Leadership & Activities

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Indonesia

Machine Learning Cohort

August 2023 – January 2024

- Completed a Machine Learning learning path covering Python, TensorFlow, Google Cloud integration.
- Developed communication, leadership, English, and career readiness skills through structured professional development modules.
- Delivered a product-based capstone project with cross-functional teammates from ML, Cloud, and Mobile

learning path to address a real-world problem using AI and cloud technologies.

- Worked in an agile, remote-first environment, using Trello, GitHub, and Google Workspace to improve collaboration and project execution.

Skills & Interests

Technical: Typescript, PHP, Go, Wordpress, MySQL, PostgreSQL, SQLite, React, NextJS, Vue, Express.js, NestJS, Laravel, Cloudflare, Google Cloud Platform

Language: English, Bahasa Indonesia

Interests: Software Development, Fullstack Development, Cloud Computing, Project Management, DevOps, Machine Learning
