WORK EXPERIENCE

PT Bank Rakyat Indonesia

AI Quality Control Tester

Jakarta, Indonesia

June 2026 - Present

- Validated the migration of 100+ services across three AI-powered banking products by performing smoke tests and verifying application health and monitoring in Elastic APM.
- Performed data quality checks on ETL pipelines within the Cloudera Machine Learning platform, validating data accuracy, completeness, and consistency against Business Requirements Document (BRD) specifications.

Metro Indonesian Software

Fullstack Developer

Padang, Indonesia

September 2024 - April 2026

- Developed 10+ dynamic wedding e-invitation templates using Vue.js, integrated with a RESTful API to handle RSVPs, guest messages, and live event updates for personalized experiences.
- Architected high-volume booking platform for 9-branch retail chain using React, NestJS, and MySQL, processing 150+ daily transactions via Midtrans payment gateway.
- Designed and deployed scalable Express.js backend with SQLite database for custom ERP system, centralizing real-time inventory management for 200+ products across 7 branches.
- Built and designed a responsive landing page using React integrated with a Laravel-based CMS, enabling dynamic content management and improving maintainability and update efficiency for non-technical users.
- Built and designed a full-stack landing page system using React, NestJS, and PostgreSQL, focusing on RESTful API development and responsive UI components for dynamic and reliable content delivery.
- Automated recruitment data pipeline by integrating web forms with Google Drive and Sheets, processing 1000+ applicants without manual intervention, reducing HR administrative time.
- Built a news website using WordPress and Elementor, implementing responsive layouts, reusable templates, and content workflows to simplify article publishing and improve site performance.

Studio20 Malaysia

Backend Developer

Remote

September 2025 - October 2025

- Built and designed a NestJS module integrated with Firebase Cloud Messaging, implementing token-based notification services and event-driven architecture for real-time user alerts.
- Integrated Better Auth into the NestJS backend to implement secure user authentication and authorization.
- Optimized database schema initialization, ensuring data consistency and integrity across development, staging, and production environments.

PT Surveyor Indonesia

Human Resource Intern

Jakarta, Indonesia

November 2023 - February 2024

- Digitized employee records by converting 500+ paper leave letters and HR documents into organized electronic files, improving accessibility and reducing record retrieval time.
- Designed and developed a Laravel-MySQL prototype for a web-based leave management system aimed at digitalizing employee leave processes.
- Supported onboarding processes by preparing new hire documentation, conducting orientation sessions, and updating employee records.
- Developed and maintained Microsoft Excel spreadsheets with automated formulas to compute employee tax deduction

EXPERIENCES

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Indonesia

Machine Learning Cohort

August 2023 – January 2024

- Completed Machine Learning learning path, focusing on Python programming, TensorFlow, data preprocessing, model deployment, and Google Cloud integration.
- Strengthened soft skills through Bangkit's English, leadership, communication, and career development modules.
- Built a product-based capstone project with cross-path team members (ML, Cloud, Mobile) to solve a real-world problem using AI and cloud technologies.
- Collaborated in an agile, remote-first team environment, improving communication and project management using tools like Trello, GitHub, and Google Workspace.

EDUCATION

Universitas Andalas

Padang, Indonesia
